Layton – The city of Bountiful and Wasatch Integrated Waste Management District (Wasatch Integrated) have approved an agreement to provide convenient and economic disposal of green waste to residents of southern Davis County.

Residents of North Salt Lake, Woods Cross, West Bountiful, Centerville, and surrounding unincorporated areas may now deliver clean green waste to the green waste recycling facility at the Bountiful Landfill. Previously, green waste generated within these cities was recycled at the Davis Landfill operated by Wasatch Integrated Waste Management District.

South Davis residents will be charged the same rate as Bountiful residents for the service, currently \$3.00 per truck load. Recycled products generated at the Bountiful facility will also be available for sale.

This arrangement provides for recycling of green waste only. Any refuse or garbage will not be accepted from non-Bountiful residents at the landfill.

Nathan Rich, Executive Director of Wasatch Integrated, said “This is a win win agreement. By working together with the City of Bountiful we are able to bring additional services to the south end of Davis County without duplicating services. Residents and the environment win by not having to drive all the way to Layton to recycle their yard trimmings.”
