

EMERGENCY PURCHASE JUSTIFICATION

DATE: August 28, 2023

PURCHASE ORDER NUMBER: 61305

SUPPLIER NAME: NINTH WEST WELDING & REPAIR LLC

DESCRIPTION OF MATERIAL AND/OR SERVICES: Reduce Dolly Height by 6 inches

EMERGENCY JUSTIFICATION:

Lowering this dolly six inches is critical in avoiding harm or a risk of harm to equipment and to the safety of personnel operating and unhooking the dolly. This is a necessary repair or service (PO #61305) because when trailers are unhooked from the dolly, they drop up to six inches (when fully loaded). At its current height, the landing legs are at risk of catastrophic failure potentially putting personnel in harm's way and causing damage to the trailer and other equipment, in addition to hampering transfer operations. Ninth West Welding & Repair LLC is the only vendor identified by purchasing along the Wasatch Front who will work on all makes of dollies and can perform the work in a timely manner.

APPROVAL:

Todd Quinley, Purchasing Manager
Wasatch Integrated Waste Management District
